Rajinder Singh Aswal : AACR2R With MARC21: Cataloguing Practice for 21st Century before purchasing it in order to gauge whether or not it would be worth my time, and all praised AACR2R With MARC21: Cataloguing Practice for 21st Century:

"This manual aims to maintain the tradition established by AACR2 and MARC 21 and seeks to fulfill the same aims that is to provide a clear and comprehensive overview of modern cataloguing theory, policy and practice and to

provide in depth description of various fields of AACR2R into MARC 21. To facilitate reading and understanding, this book is divided into two parts, Part-I - Description and Part-II - Choice of Access Points). This volume is intended as a blueprint of goodcataloguing ptactice."
