**A. Adu Boahen : African Perspectives on Colonialism (The Johns Hopkins Symposia in Comparative History)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised African Perspectives on Colonialism (The Johns Hopkins Symposia in Comparative History):

rare books on colonial history from the African point of view. This point of view is not given the place it needs to have in the writing of history. 1 of 1 people found the following review helpful. great book

great book on African history, as the book is titled African perspectives, this book is great because it is written from the viewpoint and opinion of an African prof. Great for any one wanting to learn modern African history. 0 of 0 people found the following review helpful. Four Stars

different outlook on European colonization in Africa told by the colonized. I found it very interesting

This history deals with the twenty-year period between 1880 and 1900, when virtually all of Africa was seized and occupied by the Imperial Powers of Europe. Eurocentric points of view have dominated the study of this era, but in this book, one of Africa's leading historians reinterprets the colonial experiences from the perspective of the colonized.

"Contradict[s] the extraordinary myth that Africa 'has no history..'Boahen is one of the pioneers in the school of African historiography." (Times Literary Supplement)"Here is the story from the other side; it serves as a needed corrective to the ubiquitous Eurocentric point of view." (Choice)
