**Carolyn Norwood, Mearl R. Guthrie : Alphabetic Indexing, 6th Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Alphabetic Indexing, 6th Edition:

Government or foreign countries (very confusing). For our final exam, we had to index 100 cards write them out onto forms. A 2-hour exam took 3-1/2 for us! One of the "cards" to file was for the U. S. Smithsonian Institute. There is debate as to whether or not this is a government entity (it is fundamentally owned operated by the U. S. Government, but is not a part of the legislative, governmental or judicial branches, according to one Website); since the U. S. Coast Guard is filed under the "United States Government" area, then wouldn't it be the same for the Smithsonian? Too much confusion in that area should be written better more thoroughly.0 of 0 people found the following review helpful. Simply AmazingBy AngellI am absolutely happy with both the product and the seller. As a required text for my class I was amazed to find it for a fraction of the cost. The seller was amazing. No problems what-so-ever. I highly recommend both product and seller to other buyers.

The Sixth Edition of this popular book has been totally revised to reflect the latest advances and applications of alphabetic indexing rules in business today. With its short completion time, it's ideal for any course in which students must learn to file.
