Tai Ng PhD : Chinese Culture, Western Culture: How Cross-Cultural Views of History, Philosophy and Human Relationships Will Change Modern Global Society before purchasing it in order to gage whether or not it would be worth my time, and all praised Chinese Culture, Western Culture: How Cross-Cultural Views of History,

Philosophy and Human Relationships Will Change Modern Global Society:

0 of 0 people found the following review helpful. Our future is here now!By Marty AlbeeI am of a similar mind. Forward thinking about China and the US raises my awareness how much we need to understand and help ourselves be conscience of how others understand each other. A very enlightening read. Thank you, Bob Albee. I would recommend this book to anyone!0 of 0 people found the following review helpful. Five StarsBy MyraGood!4 of 4 people found the following review helpful. Excellent readingBy Mary Ann P. AudiaMy son is studying Mandarin Chinese as well as their culture and is presently over in Beijing going to school - he found this book very interesting in relation to his studies - took it with him as a reference. Would recommend this to anyone serious about studying their culture.

China is emerging front and center on the global economic stage as a new member of the World Trade Organization (WTO) and the World Health Organization (WHO). Beijing will host the 2008 Summer Olympics and Shanghai will host Expo 2010. Moreover, China is becoming a major trading nation. Is Western culture ready to respect a country known primarily for population control and communism? Chinese Culture, Western Culture asserts that as these events unfold, the Western world will naturally want to know more about China. People will have to filter through an excessive supply of information, and in some cases, misinformation, to understand a culture that has traditionally held so little of the Western world's attention. A primer that explores the complementary aspects of Chinese and Western cultures, this book demonstrates how we can learn from both in order to establish a dynamic balance in this new era of globalization and rapid technological advancement. By discovering new ways of thinking, we can transform how we do business, how we treat our environment, and how we interact with others as we face future challenges.

About the AuthorTai P. Ng is a PhD geophysicist who studied, worked, and lived throughout Australia, the United States, and Canada for fifty years. Wah-Won Ng is a Canadian-born Chinese, who watched her father's lifelong personal interest in Chinese culture and history, and wanted to make his ideas more accessible to the general public.
