Jain Fletcher : Collection-level Cataloging: Bound-with Books (Third Millennium Cataloging) before purchasing it in order to gage whether or not it would be worth my time, and all praised Collection-level Cataloging: Bound-with Books (Third Millennium Cataloging):

1 of 1 people found the following review helpful. Bound-in essentialsBy Julian V. HillsA dense and worthwhile guide, in two parts: a survey of problems and current solutions -- historically, how catalogers have dealt with the collections of separately-published pamphlets, songs, tracts, etc., bound in one volume; and a prescription for uniformity and

utility in computer-based cataloging in the present day. Well done, even though the pedestrian style sometimes makes for hard reading.

A complete discourse on "bound-with books" will help catalogers create records for these materials that are appropriate to their value and uniqueness. 10 full-length sample records, plus examples of how individual fields may be entered A computer-based drawing depicting a bound-with book, along with a diagram of how features of each item in the book are "translated" into catalog records 12 representative photographs showing the various forms the volumes take and the various ways the internal items are bound Examples of less straightforward, bound-with situations, along with the decision-making considerations applicable to them

From Booklist Anyone who has been faced with cataloging a volume containing more than one book (called a bound-with book) will appreciate this all-in-one resource that provides an overview of the history, past and current practices, and more related to dealing with this special type of material. Part of the Third Millennium Cataloging series, this volume is based on older cataloging standards, which does not detract from the usability of the theories and concepts presented. The seven chapters are a thought-provoking read about the cataloging of these materials, addressing an issue that has been only glossed over in most cataloging guides and handbooks. A valuable guide to ensure proper care and attention is paid to the treatment of bound-with books in the bibliographic record. --Sara Marcus "Anyone who has been faced with cataloging a volume containing more than one book (called a bound-with book) will appreciate this all-in-one resource that provides an overview of the history, past and current practices, and more related to dealing with this special type of material. Part of the Third Millennium Cataloging series, this volume is based on older cataloging standards, which does not detract from the usability of the theories and concepts presented. The seven chapters are a thought-provoking read about the cataloging of these materials, addressing an issue that has been only glossed over in most cataloging guides and handbooks. A valuable guide to ensure proper care and attention is paid to the treatment of bound-with books in the bibliographic record." - Booklist Online About the Author Jain Fletcher is principal cataloger and head of the technical services division in the Department of Special Collections at University of California, Los Angeles, in Los Angeles, CA.
