Jean-Paul Sartre : Colonialism and Neocolonialism (Routledge Classics) (Volume 15) before purchasing it in order to gage whether or not it would be worth my time, and all praised Colonialism and Neocolonialism (Routledge Classics) (Volume 15):

4 of 4 people found the following review helpful. best ever essays on crime almost without punishmentBy Wouter Krijbolderbest ever essays on crime almost without punishment, the robbing of the entire world, enslaving. pillaging, raping and starving the indigenes. the inheritance of this crime talking century upon century we can follow during this

day and age of neocolonialism, the Iraq etc. etc. debacles, a accident waiting to happen, not described by Sartre, implicit to the outrageously sharp and on the nose texts in these translated reviews of then published works by Memmi, Fanon, Alleg and others. "Colonialism is a system" alright, one of the best chapters by Sartre is a jaw dropping read, for it is a system still in place, here to stay, the powers that be simply changes labels, not counties are the colonies, the world as a whole is; multinationals roam the earth, and we, consumers and workers are the wretched. 1 of 1 people found the following review helpful. Four Stars By Customer Interesting and provocative critique of European colonialism. I'm still reading it, so I cannot off any more.

Nearly forty years after its first publication in French, this collection of Sartres writings on colonialism remains a supremely powerful, and relevant, polemical work. Over a series of thirteen essays Sartre brings the full force of his remarkable intellect relentlessly to bear on his own countrys conduct in Algeria, and by extension, the Wests conduct in the Third World in general. Whether one agrees with his every conclusion or not, Colonialism and Neo-Colonialism shows a philosopher passionately engaged in using philosophy as a force for change in the world. An important influence on postcolonial thought ever since, this book takes on added resonance in the light of the Wests most recent bout of interference in the non-Western world.
