Marta Mestrovic Deyrup : Creating the High-Functioning Library Space: Expert Advice from Librarians, Architects, and Designers before purchasing it in order to gage whether or not it would be worth my time, and all praised Creating the High-Functioning Library Space: Expert Advice from Librarians, Architects, and Designers:

This book provides practical information and insights to library administrators and building plan team members at academic and public libraries who are considering or starting a library expansion or reconfiguration of existing space. Covers all of the steps in the building process, from preparing the RFP and selecting an architect to developing a financial contingency plan and managing community and staff expectations Includes contributions from some of the most accomplished library architects and designers from across the nation Presents information of great relevance and interest to library administrators as well as to architectural firms that work with libraries

"A guide to the establishment of a public or academic library, Deyrup's overview outlines priorities. The thirteen chapters coordinate the writings of sixteen experts in architecture, interior design, and library services. Essential to the planning stages, descriptions of community and campus evaluations and user needs precede the hiring of structural consultants. . . . This text is recommended for an audience needing a guide for the titular purpose." - VOYA
About the Author
