Qiang Jin : Demystifying FRAD: Functional Requirements for Authority Data (Third Millennium Cataloging) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Demystifying FRAD: Functional Requirements for Authority Data (Third Millennium Cataloging):

Improve your understanding of the basics of Functional Requirements for Authority Data (FRAD): A Conceptual Model with this text and help readers create RDA authority records.

"Demystifying FRAD serves as an excellent, all-in-one resource for understanding the FRAD model and its relationship to authority work under RDA. Its greatest applicability is as a 'ready-reference' guide, a resource that a librarian can pull off the shelf when encountering questions about a specific situation." - Library Resources and Technical Services

"A clearly written, copiously illustrated, and well-organized book that truly does 'demystify' FRAD . . . Demystifying FRAD is both timely and valuable." - College Research Libraries

"Overall, Qiang Jin has succeeded in shedding light on FRAD. She has included a number of excellent examples, the FRAD to RDA mapping, and the chapter on relationships. This book is definitely a much-needed entry into an area that has seen little to no publications on the subject." - Online Audiovisual Catalogers, Inc

About the Author
Qiang Jin is senior coordinating cataloger, NACO coordinator, and associate professor of library administration at the University of Illinois, Urbana-Champaign Library.
