**Wolfgang Schivelbusch : Disenchanted Night: The Industrialization of Light in the Nineteenth Century** before purchasing it in order to gage whether or not it would be worth my time, and all praised Disenchanted Night: The Industrialization of Light in the Nineteenth Century:

0 of 0 people found the following review helpful. Rich cultural history of technologyBy Sherwood HallNot without its flaws, but a wealth of interesting information and insights. I've now sent an additional three copies to friends.0 of 0 people found the following review helpful. This is a super cool book - I imagine it would be very ...By BugThis is a super cool book - I imagine it would be very helpful to artists doing period set design, or artisans making replicas of antique lamps, etc. Also very interesting information of the role of lighting in wars, police, and home life.1 of 1 people found the following review helpful. The industrialization of Light!By Rachel NewmanThis is a fascinating and scary book documenting the rapid industrialization of light that occurred almost before we knew it around the turn of the last century. Very interesting and little known stories, well-researched and written.

Wolfgang Schivelbusch tells the story of the development of artificial light in the nineteenth century. Not simply a history of a technology, *Disenchanted Night* reveals the ways that the technology of artificial illumination helped forge modern consciousness. In his strikingly illustrated and lively narrative, Schivelbusch discusses a range of subjects including the political symbolism of streetlamps, the rise of nightlife and the shopwindow, and the importance of the salon in bourgeois culture.

.com The story of the development of artificial light in the 19th century is not only a history of its technology but a revelation of how that technology helped forge modern consciousness. The range of subjects includes the political symbolism of streetlamps, the rise of nightlife and the shop window, and the importance of the salon in the bourgeois culture. Very Highly Recommended. "A readable, highly personal, often original, and deliberately provocative attempt to integrate the story of artificial light with the history of modern life."--Neil Harris, "ScienceLanguage NotesText: English, German (translation)
