## **Robert G. Chenhall : Nomenclature for Museum Cataloging: A System for Classifying Man-Made Objects**

before purchasing it in order to gage whether or not it would be worth my time, and all praised Nomenclature for Museum Cataloging: A System for Classifying Man-Made Objects:

0 of 0 people found the following review helpful. Nice bookBy Eileen LarkinThis is an older version, but I don't think things have changed that much. We are starting a museum and historical society in our area. The old one lost its location and closed up. We have secured a building that we are completely redoing. The last group did all the cataloging correctly and we need to continue their work. I haven't had a chance to use it much yet as we are busier with getting the building and lot completed. It will get a lot of use as we have many who are holding items for us until we are ready for them. I would use this seller again without hesitation. Great service.
