**Max Kozloff : Now Becoming Then** before purchasing it in order to gage whether or not it would be worth my time, and all praised Now Becoming Then:

This retrospective look at Duane Michals oeuvre by the esteemed writer Max Kozloff is the first major critical evaluation of the artist's contribution to the history of photography. Many of Duane Michals' early sequences and portraits are published here as well as previously unpublished new work. This publication accompanied a three year traveling museum exhibition which opened December 11, 1990 at San Diego's Museum of Photographic Art.
