Paul Pedley : Practical Copyright for Library and Information Professionals (The Facet Copyright Collection)
before purchasing it in order to gage whether or not it would be worth my time, and all praised Practical Copyright for
Library and Information Professionals (The Facet Copyright Collection):

The UK's copyright legislation has been referred to as the longest, most confusing and hardest to navigate in the world. This new handbook brings clarity to what would otherwise be a complex topic. The author provides sensible and realistic guidance for all library and information practitioners. Topics covered include: * the copyright exceptions or permitted acts most relevant to library and information professionals * lending of print and electronic copyright materials * the range of licensing solutions available to ensure that the use of copyright works is done in compliance with the law * the options available for making copies of orphan works (such as where this is done as part of digitization projects) * an exploration of how information professionals working in the corporate sector can copy material legitimately, and highlights where this differs from practitioners working in not for profit publicly accessible libraries. The handbook is an indispensable guide for library and information professionals; it will be useful for academics and researchers, and it will also be essential reading for anyone wishing to use copyright material legitimately.

You can use the book in two ways - to grab off the shelf to answer a copyright question quickly or to sit down with and the links to further reading online. Either way, you will come away more enlightened and confident about copyright. I would recommend the book to anyone with an interest in copyright. -- CILIP CLSIG Journal

Exceptionally well written, organized and presented, Practical Copyright for Library and Information Professionals should be considered a "must" for the reference collections of all community, corporate, governmental, and academic libraries and included as a core supplement for Library Science Studies student curriculums. --Midwest Book About the Author

Paul Pedley MA MLib FCLIP has been following developments in UK copyright law for nearly twenty years. He has been a member of the Libraries and Copyright Alliance since 1998, and regularly trains, lectures and speaks on copyright and other areas of information law. He is the author of a number of books published by Facet Publishing including the E-copyright Handbook, Digital Copyright, Copyright Compliance: Practical steps to stay within the law and Essential Law for Information Professionals.
