Bernd Carsten Stahl : Responsible Management of Information Systems before purchasing it in order to gage whether or not it would be worth my time, and all praised Responsible Management of Information Systems:

0 of 0 people found the following review helpful. Pretty light read for a text book thoughBy QPNWRequired text for an IS class. Pretty light read for a text book though. Worth a read even if there wasn't a class involved.

This work discusses the question of how information systems can be used and managed in a responsible manner. It defines the central concepts of information systems as the business use of information technology and the underlying concepts of ethics and morality.

About the Author Bernd Carsten Stahl, is currently a Senior Lecturer in the Faculty of Computer Sciences and Engineering and as a Research Associate at the Centre for Computing and Social Responsibility of De Montfort University, Leicester, UK. His area of research consists of philosophical, more specifically of normative, questions arising from the use of information and communication technology. The emphasis in this area is on the notion of responsibility. He researches the application of such normative questions in economic organisations, but also educational and governmental institutions. His second area of interest consists of epistemological questions in Information Systems research. He is a member of the editorial review board of the Journal of Information Systems Education and the Journal of International Technology and Information Management. Furthermore he continues to serve on conference committees, such as the Information Resource Management Association Conference or the European Conference on E-Government. He also serves as a reviewer for several other international journals and conferences.
