Studies in the Economics of Aging (National Bureau of Economic Research Project Report):

Studies in the Economics of Aging is the fourth book in a series from the National Bureau of Economic Research that addresses economic issues in aging and retirement. Building on the research in *The Economics of Aging* (1989), *Issues in the Economics of Aging* (1990), and *Topics in the Economics of Aging* (1992), this volume examines elderly population growth and government spending, life expectancy and health, saving for retirement and housing values, aging in Germany and Taiwan, and the utilization of nursing home and other long-term care.

From the Back Cover Studies in the Economics of Aging is the fourth book in a series from the National Bureau of Economic Research that addresses economic issues of aging and retirement. Building on the research in *The Economics of Aging* (1989), *Issues in the Economics of Aging* (1990), and *Topics in the Economics of Aging* (1992), this volume examines issues related to population aging and the health and well-being of the elderly. Chapters cover population aging and government spending, life expectancy and health, saving for retirement and the role of 401(k) plans, demographic transition and housing values, aging in Germany and Taiwan, and the utilization of nursing homes and other long-term care. Economists, policymakers, and professionals in gerontology will find this book a useful reference for understanding the demographic and economic trends that affect the elderly. About the Author David A. Wise is the John F. Stambaugh Professor of Political Economy at the Kennedy School of Government at Harvard University. He is the area director of Health and Retirement Programs and director of the Program on the Economics of Aging at the National Bureau of Economic Research.
