**Eric L. Ball : Sustained by Eating, Consumed by Eating Right: Reflections, Rhymes, Rants, and Recipes** before purchasing it in order to gage whether or not it would be worth my time, and all praised Sustained by Eating, Consumed by Eating Right: Reflections, Rhymes, Rants, and Recipes:

2 of 2 people found the following review helpful. Ball the Cretan: Chopping onions without a cutting board.By

gdanelisBall's memoir offers an engaging report of the -sometimes very subtle- differences between learning and acquiring (in a technical sense) modes of behavior and ways of living as demonstrated by sentient life's striving to imbue the universe with meaning and purpose. By focusing (mostly) on variant human customs and practices in the procurement, preparation, and consumption of food, Ball provides the reader with many interesting observations about (mainly his) life in the Mediterranean and North America, not to mention delectable anecdotes involving edible items as diverse as hobo bread and oversized kabobs (aptly baptized as "souvlaras" by him -a non-native speaker of Greek I might add, but a worthy descendant of his literary Cretan hero, Kanzantzakis).

When Eric L. Ball returned to his hometown in northern New York after a fifteen-year absence that included time in Greece, he began building his version of the good life, largely revolving around growing, foraging, and cooking safe and wholesome foods. Yet, surrounded by family and old memories, he found himself grappling with the loss of his unlikely Mediterranean past and struggling to navigate the interplay of intellectual convictions and emotional needs as he strived to construct a fulfilling ethical life in the unsustainable modern world. In *Sustained by Eating, Consumed by Eating Right*, Ball shares his experiences and explores questions about food and drink, including the relationship between recipes and learning, the significance of the Mediterranean diet, how to cook authentic Greek foods in the United States, and how to obtain safe and healthy food in a toxic world. Ultimately, Ball considers broader questions about the evolving significance of family, the nature of freedom, the future of the environment, and thinking that one can change the world. The result is a bittersweet story that ponders questions about living a decent and fulfilling life when it comes to food and family.

"A fascinating account of a life devoted to deep appreciation of family, food, and cultural difference. So engaging and well-written you won't want to put it down." -- Eugene W. Holland, The Ohio State University  
From the Back Cover  
"When Hippocrates asked Socrates what nourishes the soul, Socrates replied, 'Knowledge.' Plato, Socrates' student, however, did not think such knowledge could be found in the kitchen. Eric Ball, a true philosopher and an honorary Greek, knows better. This delightful culinary odyssey explores the relationship between eating right and living right. Ball's mental journey parallels a physical one as he travels from the grey skies of New York's North County to the blue sea of Crete. Along the way, he forages for dandelion greens, hunts wild mushrooms, tenderizes spring lamb, and improvises mantinades over baklava and coffee. Practicing filoxenia, the ancient art of hospitality, Ball is the perfect host for thoughtful readers. Buy his book. St. Euphrosynos, patron and guardian of the Greek kitchen, will bless you." -- Anthony Di Renzo, author of *Bitter Greens: Essays on Food, Politics, and Ethnicity* from the *Imperial Kitchen*  
About the Author  
Eric L. Ball is Associate Professor of Cultural Studies at Empire State College, State University of New York. He lives in the Town of Moreau, New York.
