**Lourdes B. Avils : Taken by Storm, 1938: A Social and Meteorological History of the Great New England Hurricane** before purchasing it in order to gage whether or not it would be worth my time, and all praised Taken by Storm, 1938: A Social and Meteorological History of the Great New England Hurricane:

0 of 0 people found the following review helpful. Four StarsBy Sunnie1959I liked this book, but much prefer to read about real people more than technical things about the storm.5 of 5 people found the following review helpful. Unusual approach to a historical event.By Allen E. LawtonWhile I was born a couple of years after the storm my mother was rescued from a 2nd story window in her office building in Providence. That storm remained in the Rhode Island consciousness for many years. This book is a worthwhile history of that terrible storm.3 of 3 people found the

following review helpful. a meteorologists must readBy Helmut G.A carefully researched story, part of the necessary reading for those interested in understanding the history of weather tracking and prediction, their methods and innovations, and the heroes of meteorological science who are our best guides to preparing for the future.

On September 21, 1938 one of the most powerful storms of the twentieth century came unannounced into the lives of New Yorkers and New Englanders, leaving utter devastation in its wake. The Great Hurricane, as it came to be known, changed everything, from the landscape and its inhabitants lives, to Weather Bureau practices, to the measure and kind of relief New Englanders would receive during the Great Depression and the resulting pace of regional economic recovery.

"The great New England hurricane of 1938 devastated much of Long Island and southern New England. . . .The result was a massive loss of life and property in inlandNew England as well as along the coast. Avils describes the life cycle andaftermath of the storm and in the process provides a thorough history of meteorology and hurricane prediction in theearly 20th century."
