**Robert Kenny : Teaching TV Production in a Digital World: Integrating Media Literacy, Student Workbook, 2nd Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Teaching TV Production in a Digital World: Integrating Media Literacy, Student Workbook, 2nd Edition:

0 of 0 people found the following review helpful. Five StarsBy JosephGreat product

This guide has been completely updated with all of the latest technological advances to provide an exciting, alternative approach to teaching first-year television production to high school students. A combination of class instruction and independent video action projects based on the concept of thematic mapping prepares students for a year-end video

competition. The projects borrow knowledge from other academic subject areas to teach media and visual literacy, broadcast history, video production skills, and multimedia animation. Available in both teacher and student editions.

"[M]ost valuable as a resource guide for teachers planning new courses. It is clearly laid out and provides good examples of learning objectives, lesson plans and activities, and methods of assessment."-Learning Media and Technology  
"Most valuable as a resource guide for teachers planning new courses. It is clearly laid out and provides good examples of learning objectives, lesson plans and activities, and methods of assessment."-Learning Media and Technology
