**Ilan I. Berman : Tehran Rising: Iran's Challenge to the United States** before purchasing it in order to gage whether or not it would be worth my time, and all praised Tehran Rising: Iran's Challenge to the United States:

It is easy to follow the time-line and reasoning used by the rulers in deciding to make war on all of the western world and how they used their religious fervor to inspire some people to become suicide bombers. Mr. Berman is quite knowledgeable and gives info on the political,

financial and social history and changes that brought us to this point. He also shows the ties to China and Russia and outreach to other nations. This is an eye opening and educational book to help you keep abreast of what is happening in the world today. 0 of 0 people found the following review helpful. One-sided analysis but very well written By Dimitrios For some reason Ilan Berman is strongly biased towards Israel, thus he can not present Iran but as a radical, dangerous, terrorist-sponsoring state which must be eradicated. Although he does not keep the balance when he cites his well founded arguments, he is a very able scholar and analyst. He says that the radical reversal of oil prices, from \$30 to more than \$70 in the last five years, has given Iran an unexpected economic windfall, helped to jump-start Tehran's rearmament and to revive the Islamic Republic's regional ambitions. Iran has indeed been connected to many terrorist activities, has a more aggressive military posture recently and has tried to export the revolution to its immediate neighborhood but there is no proof that it tried to destabilize the global markets by raising the prices exorbitantly. Berman has many arguments though to show that Iran has made many attempts to form an anti-American axis in the region and play its own "great game" in central Asia (which I find absolutely logical given its encirclement by US forces). When studying the preemptive air strikes scenarios (which do not cover more than a couple of pages), he agrees with the results of recent wargames held in the US, which concluded that "the available American military options are likely to fail in the long term". He also tries hard to hide the fact that Israel is always behind these war scenarios, stating that "the West should not expect "Little Israel" to avert a crisis over Iran's nuclear program" and referring to Ariel Sharon's diplomatic statement that "Israel is not planning to attack Iran. The way to treat Iran is to exercise political and economic pressure". It seems that Israel wishes to keep its hands clean this time, sending US military to do the dirty job on its behalf like it did in Iraq! On the other hand, if the pressure on the US will not bear fruit, then Israel itself will probably take action against Iran. Analysing what must be done in order to defuse the crisis, Berman supports a more energetic diplomatic campaign, by using Turkey, Pakistan and the Caspian states to contain Iran. He adopts the theory that the Iranian people is on the verge of a new revolution against the theocratic regime (something that I doubt) and that the last needs only a push in order to collapse. "Iran is in the throes of a demographic and ideological upheaval" he writes, and "the country's political consensus has begun to crumble". In order to speed this process, destroying the Iranian regime from within, he suggests that US and her allies should adopt the Reagan Doctrine of the '80s: expanding and optimizing existing outreach, financing external broadcasting sources, funding complimentary public diplomacy and political warfare mechanisms, and deterring foreign interference. "The resuscitation of such initiatives toward Iran is especially vital, given the age of the Iranian population (70% under the age of 30) and their increasingly evident discontent with the current clerical regime". The author stretches his argument further, saying that "the Iranians are still in search of their Lech Walesa" and that "the overthrow of the Islamic Republic of Iran is good for America and good for the Iranian people". Analysts like Berman seem not to have learnt anything about people's attitude and Islamic feelings from the Iraqi adventure and expect the Iranians to hail US sanctions or military strikes as a chance to get free! I think this is a very dangerous illusion. Besides, when Berman recounts president Bush's saying that "the US must defend liberty and justice because these principles are right and true for all people everywhere" someone must remind him of the "liberty and justice" of occupied Cyprus and the numerous UN decisions that Turkey defies for 30 years with the support of the US. The world is not black and white and the US are not the crusader of liberty and justice but just of their own strategic interests like any superpower before them, and this is the bitter truth.

The Islamic Republic of Iran today constitutes the single greatest challenge to the United States and the War on Terror. In the Persian Gulf and Central Asia, Iranian policymakers are busy cobbling together alliances intended to elevate it to the status of a regional superpower at the expense of the U.S. and its European allies. In Iraq, Iran is spending millions to perpetuate a lingering insurgency that threatens to transform the former Ba'athist state into another Islamic Republic. Iran remains the world's most active sponsor of terrorism, fueling the activities of Hamas, the Palestinian Islamic Jihad, Hezbollah and al-Qaeda. And through its nuclear advances, mature chemical- and biological weapons programs, and an expanding conventional military, Iran is gaining the capability to catastrophically alter the balance of power far beyond its immediate neighborhood. All of this has been guided by an ambitious strategic agenda that is designed to make the Iranian regime the center of gravity in the post-Saddam Middle East. As evidence of this threat mounts, one thing remains crystal clear to Ilan Berman: "Washington is woefully unprepared to deal with this mounting peril." Berman's approach is hard-hitting, provocative and unflinchingly critical. But he takes the exploration of Iran's menace one step further, providing what has been missing so far in the foreign policy discourse regarding Iran, both within the U.S. government and outside its practical policy prescriptions designed to contain Iran's strategic ambitions.

Mr. Berman lays out a thoughtful U.S. strategy for containing Iran diplomatically, by rallying Turkey, Russia, and the Gulf state into greater appreciation of the regional threat Iran represents, while assuring them all of U.S. support. (The Washington Times) Ilan Berman's careful analysis and shrewd policy prescriptions are a welcome antidote to the fuddle that our Iran policy has become: Engage the great Iranian people, not its thugocratic theocracy. Exactly. (R.

James Woolsey, former Director of the CIA; Chairman, Woolsey Partners LLC) Ilan Berman has written a powerful and compelling book about the greatest threat facing Israel and one of the greatest threats facing America, the emergence of a nuclear armed Iran. Every serious student of history who wants to understand the threats facing freedom and democracy should study this book. (The Honorable Newt Gingrich, former speaker of the U.S. House of Representatives (1995-1999)) Ilan Berman chronicles two decades of listlessness in American policy to Iran. . . . His is a thoughtful assessment of a serious longstanding problem, and merits a careful read. (The Honorable John J. Hamre, former Deputy Secretary of Defense (1997-1999)) A probing and insightful examination of Iran's growing threat to stability in the Middle East. Berman's work should be a wake-up call for policymakers in Washington. (Congressman Jim Saxton) Berman makes a strong case for a U.S. policy of regime change; his book deserves serious attention. (Michael Potemra National ) In [Berman's] view there is no better place to continue the President's campaign in the Middle East than Iran. . . . However one may be attracted or repelled by [this] judgment, many readers are likely to feel enriched by learning what the volume provides on the very real problems of the region. (Maj. Gen. Edward B. Atkeson, U.S. Army retired Army Magazine). . . compelling . . . Anyone interested in the war on terror, and Iran's role in it, should read this thoughtful tome. (Steven Greenhut Orange County Register) For those who wonder why Washington is so worried about Iran's nuclear program, Ilan Berman's Tehran Rising is a gripping, timely reminder. . . . [Ilan Berman] has done such a convincing job in portraying the ruthlessness of the current rulers in Tehran . . . If the United States and indeed, the world loses, no one can say Berman didn't warn us. (Paul Owens Orlando Sentinel) Mr. Berman's timely book explains both the urgency and the importance of the problem. (Martin Walker, Editor of United Press International, and a senior fellow at the World Policy Institute The Washington Times) Ilan Berman has written a useful new book that helps make sense of Iran's ambitions, and the means they are using to try to achieve them. Tehran Rising describes the consequences of the worst-case scenario, an emboldened nuclear-armed Iran establishing regional hegemony and continuing to utilize the cat's paw of terrorist surrogates that it has perfected in over 25 years of state sponsorship. (James S. Robbins, Trustee, Leaders for Liberty Foundation) Tehran Rising sets forth the serious and imminent threat Iran poses in its own region and to the United States and its allies. . . . Most readers will come away convinced not only that the Iranian threat is real, but also that steps must be taken without delay to prevent its nuclear weapons program from reaching maturity. (Peter Hannaford, senior counselor to the Committee on the Present Danger The Weekly Standard) Ilan Berman's efficient, fact-packed book . . . indicates plenty of reasons why Western diplomacy's sudden stiffening of spine toward Iran may still be too soft, too little and too late. (Carlin Romano The Philadelphia Inquirer) Berman convincingly argues that the Iranian regime is pursuing an ambitious strategic agenda that will transform Iran into a regional superpower with the ability to greater threaten the interests of the United States and its allies. (AIPAC) Tehran Rising: Iran's Challenge to the United States is... a timely and relevant discussion on the subject. (Comparative Strategy) About the Author Ilan Berman is one of the rising stars of American foreign policy. As vice president for policy of the Washington-based American Foreign Policy Council, he is a frequent guest on radio and television. An expert on regional security in the Middle East, Central Asia, and the Russian Federation, he has consulted for both the U.S. Central Intelligence Agency and the U.S. Department of Defense, and provided assistance on foreign policy and national security issues to a range of governmental agencies and congressional offices. His writings on international security and American foreign policy have appeared in such influential publications as The National Interest, the International Herald Tribune, and the Financial Times, among others. Berman is adjunct professor for International Law and Global Security at the National Defense University in Washington, DC. He also serves as a member of the reconstituted Committee on the Present Danger, and as Editor of the Journal of International Security Affairs. He is also the coeditor (with J. Michael Waller) of Dismantling Tyranny: Transitioning Beyond Totalitarian Regimes (2006).
