Boorstein was head of the Library of Congress for many years and an historian with a unique observer of daily life. 2 of 2 people found the following review helpful. Five

StarsBy DkwExcellent work. Enjoyed the interesting presentation on little known origins of our language and culture0 of 0 people found the following review helpful. Very interesting!By CustomerIt is a little dry for my taste. it is full of interesting facts though. It does make me want to go and visit some of the places I read about in the bbok.

Winner of the Bancroft Prize In this brilliantly original book, written for the general reader, the American past becomes richly meaningful to the present.

.com The first book in a trilogy--and in many respects the best of the bunch--The Colonial Experience is an essential interpretation of how the habits of people who lived more than two centuries ago shaped the lives of modern Americans. Boorstin shows how an undiscovered continent shattered long-standing traditions and utopian fantasies with the hard demands of everyday life far from the sophisticated centers of European civilization: "Old categories were shaken up, and new situations revealed unsuspected uses for old knowledge," writes Boorstin. He starts with a series of penetrating essays on the Puritans of Massachusetts, the Quakers of Pennsylvania, the philanthropists of Georgia, and the planters of Virginia, then tackles a set of diffuse topics that range from astronomy to language to medicine in fascinating vignettes. The Colonial Experience is must reading for anybody interested in the development of the American character. --John J. Miller "What made the Americans Americans? This is the question posed by Daniel J. Boorstin in a thoughtful, readable and often provocative book." Wesley Frank Craven, The New York Times "This is an ambitious book, well-documented throughout, with many stimulating ideas. . . . Mr. Boorstin is searching for the the grandiose motives, probing the words and actions of the colonists for contemporary meaning." Hebert Mitgang, The New York Times "Mr. Boorstin's focus in this impressive essay in intellectual history is the interplay between ideas and institution. Using this as his perspective, he offers a fresh and arresting reading of the colonial mind." Arthur Schlesinger, Jr. "A superb panorama of life in America from the first settlements on through the white hot days of the Revolution." - Bruce Lancaster, Saturday From the Inside Flap Winner of the Bancroft Prize.
