Circle leaders working their way out of poverty, Circle allies helping with concerns that the leaders have, and those funding the programs all present their own stories of why Circles is important to them. It

makes a convincing argument for why a relational, long-term program is so effective in helping people work themselves out of poverty.

Can we really resolve poverty? Is there a DNA code that we need to crack? If so, is it possible that its already been cracked? Local communities can bring more people, resources, and influence to solve their local poverty-related problems. This book shares stories from those focused on becoming more economically stable (Circle Leaders), community volunteers (Allies), funders, program staff, researchers, and community organization leaders. Proceeds from the sale of *The Circles Story* are used for scholarships for Circles members to attend national and regional Circles conferences.
