Robert Bauval : The Egypt Code before purchasing it in order to gage whether or not it would be worth my time, and all praised The Egypt Code:

2 of 2 people found the following review helpful. An important bookBy Michael A. StarsheenThis book is filled with fascinating ideas and data to show how the ancient Egyptians used processes and plans to orient their pyramids and temples to various celestial phenomena. I recommend this book to you.3 of 3 people found the following review

helpful. Amazing reading, very interesting, especially for Egypt lovers! By Katja Cinc There are so many interesting facts presented in this book, which are not in regular history books about Ancient Egypt! Anyone interested in mysterious parts of this ancient civilisation will absolutely enjoy it! Also in this book, you can see how much knowledge about astronomy the ancient Egyptians had! I 100 % recommend it! :) 0 of 0 people found the following review helpful. Ancient Egyptian Star Lore By Violet Bunny Here Bauval studies the monuments of Upper (southern) Egypt and continues his star-correlation theory. More interesting reading from one of the world's foremost Egyptian experts.

Why did the ancients align their monuments so precisely with the stars? What were the practical and symbolic reasons behind these mysterious configurations? From the author of *The Orion Mystery*, the best-selling book that introduced the revolutionary star-correlation theory about the Giza pyramids, *The Egypt Code* reveals an amazing Grand Unified Plan behind the legendary temples of upper Egypt. Robert Bauval, one of the world's most prominent and controversial Egyptologists, completes his groundbreaking investigation of astronomy as related to Egyptian monuments and related religious texts. *The Egypt Code* revisits the Pyramid Age and the Old Kingdom, proposing a vast sky-ground correlation for the Memphite-Heliopolis region, and presenting the possibility of a grand plan spanning three thousand years of Pharaonic civilization and involving pyramids and major temple sites along the Nile. The central idea of the book is that the cosmic order, which the ancients referred to as "Maat," was comprised of the observable cycles of the sun and stars, in particular the star Sirius, and that the changes that took place due to the precession of the equinoxes and the so-called Sothic Cycle are reflected in the orientation and location of religious sites.

About the Author Born in Egypt and having lived there and elsewhere in the Middle East for much of his life, Robert Bauval has published several papers linking the pyramids with astronomy, and his findings have been presented at the British Museum. He has also written three books with best-selling author Graham Hancock (*Message of the Sphinx*, *Talisman*, and *The Mars Mystery*).
