By Julia Berg This book will educate you as to what is happening today with farm workers and the danger they face just to stay alive and take care of their families. I wish their lives were similar to year ago when they planted 3 crops at the same time. A life that was less dangerous. If only the big corporations had stayed out of the

productive small farmers life. Read this book and get to know the lives of farm workers' today. The more you know, the more you can understand to help pass laws that makes farm workers' lives saver and have more human lives.

Illuminating the dark side of economic globalization, this book gives a rare insider's view of the migrant farmworkers' binational circuit that stretches from the west central Mexico countryside to central California. Over the course of ten years, Ann Aurelia Lopez conducted a series of intimate interviews with farmworkers and their families along the migrant circuit. She deftly weaves their voices together with up-to-date research to portray a world hidden from most Americans a world of inescapable poverty that has worsened considerably since NAFTA was implemented in 1994. In fact, today it has become nearly impossible for rural communities in Mexico to continue to farm the land sustainably, leaving few survival options except the perilous border crossing to the United States. *The Farmworkers' Journey* brings together for the first time the many facets of this issue into a comprehensive and accessible narrative: how corporate agribusiness operates, how binational institutions and laws promote the subjugation of Mexican farmworkers, how migration affects family life, how genetically modified corn strains pouring into Mexico from the United States are affecting farmers, how migrants face exploitation from employers, and more. A must-read for all Americans, *The Farmworkers' Journey* traces the human consequences of our policy decisions.

From the Inside Flap "In *The Farmworkers' Journey*, Ann Lopez provides a very readable account of the human instinct for survival associated with placing agriculture products on the tables of U.S. residents. Her years of scholarly research conducted living among farmworker families provides a firsthand account of the trials, tribulations, health and social relationships of people that keep them forever attached to the soil in both the U.S. and Mexico. Her revelation of how agribusiness is subsidized by the sacrifices of farmworker families should substantially moderate the hysterical voices that mitigate the reasoning needed to address the undocumented issue as behooves a democracy." J. V. Martinez, federal government executive, and a founder of the Society for the Advancement of Chicanos and Native Americans in Science (SACNAS) "This book tells a powerful and moving story of lives affected by agricultural and trade policies, migration, and the dehumanization of farm workers. The text is an eye-opening blend of academic research and testimonials of the people directly touched by the powerful market forces that have been unleashed by trade liberalization. Lopez brings together different analytical dimensions that are normally treated separately, moving through these dimensions with an ease indicative of her extraordinary talent and expertise."
