John J. Burke : The Neal-Schuman Library Technology Companion, Fourth Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised The Neal-Schuman Library Technology Companion, Fourth Edition:

0 of 0 people found the following review helpful. great novice bookBy CustomerThis book was recommended for an introductory technology class I was taking. I bought it as a reference and more concrete information about certain technologies. I really like the clear and precise explanations of the topics. I think this is a great beginner book and just a great reference book.0 of 0 people found the following review helpful. Ok for Intro - Price/Currency are

questionable. By Roob Good as an introductory text, but not really appropriate for the graduate or doctoral level, particularly when one considers the price, and how often this text requires revision. 0 of 0 people found the following review helpful. Five Stars By Nana KMO Just what I needed for class!

The fourth edition of Burke's comprehensive resource, newly revised and updated, is a perfect primer for LIS students and should be at the top of the list for any current or future library professional looking to stay at the forefront of technological advancement. This all-in-one guide helps readers contribute to improving institutional performance, boost productivity, and stay connected to the latest library technology topics and tools by offering incisive coverage of library technology basics, with a historical overview providing context, suggested resources for staying up to date, and a chapter on appraising and purchasing equipment and putting systems into operation. Technology tools, including computers of all kinds (desktops, laptops, tablets, and mobile devices), office applications, the wireless world, the vast changes and potential of library catalogs and databases, social media, and much more. How libraries put technology to work through adaptive/assistive technology, virtual reference, blogs, screencasting, distance learning, and other day-to-day workflow. Building and maintaining technology, offering guidance on spam, spyware, security strips, and other dangers of the cyberworld, plus troubleshooting tips for typical technology problems and advice on making technology environments comfortable for users. The importance of long-range technology planning and how to take steps to start the planning process.

About the Author John J. Burke is the Director of the Gardner-Harvey Library on the Middletown regional campus of Miami University, Ohio, and a past president of the Academic Library Association of Ohio (ALAO). He has held positions in systems, reference, and public service and was program director for a web-based associate degree in library technology at the University of Cincinnati Raymond Walters College. Author of the books *IntroNet: A Beginner's Guide to Searching the Internet* and *Learning the Internet: A Workbook for Beginners*, and coauthor of *Embedding Librarianship in Learning Management Systems: A How-To-Do-It Manual for Librarians*, he has presented on a variety of technology topics at various national, state and regional conferences including ALA, ACRL, LOEX, and the LITA National Forum.
