Elizabeth Haynes, Joanna F. Fountain, Michele Zwierski : Unlocking the Mysteries of Cataloging: A Workbook of Examples, 2nd Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Unlocking the Mysteries of Cataloging: A Workbook of Examples, 2nd Edition:

0 of 0 people found the following review helpful. Large Print PleaseBy LuckyL1111This is an excellent workbook for those with perfect eyesight. This is required for a class in Graduate School at the University of Southern Mississippi and I have used it extensively so far.The negative is that some of the needed information is so small that I need a magnifying glass to get it. The other night I was using to pairs of eyeglasses to try and see. I am a "mature" student so the fact that it is more difficult to see is a given.1 of 1 people found the following review helpful. Poor quality printingBy Sima ThomasToo bad for you if you need to read any of the poor quality photocopies of DVDs or other

non black-on-white text materials. What poor quality printing!

By Heather Jones
What I expected.

Ideal for students and both beginning and practicing catalogers in public, school, and academic libraries, this updated workbook offers targeted, hands-on exercises that enhance understanding of description, classification, subject analysis, subject heading application, and MARC 21 subject analysis. Provides more than 100 examples that together encompass virtually all types of materials libraries collect and catalog, with MARC "answer" records. Offers exercises that allow practice in AACR2r and RDA, description, subject classification, subject heading application, classification, subject analysis, and MARC 21. Covers both RDA and AACR2r answer records for selected exercises. Includes non-English materials. Links to a website that provides for multiple approaches and answer records and enables you to view all the graphics in color and enlarge them as needed. Links instruction to an additional website that provides answer records for all exercises.

"Impressively well constructed, organized, profusely illustrated and presented, *Unlocking the Mysteries of Cataloging: A Workbook of Examples* is very highly recommended for academic Library Science reference collections, curriculum supplements, and supplemental studies reading lists." - Midwest Book
"I highly recommend this book to cataloging instructors and students who never seem to have enough examples and practice exercises, and to selectors for libraries that support library science curricula. It also makes an excellent resource for copy catalogers who are trying to understand the changes they are seeing in catalog records." - Technical Services Quarterly
About the Author
